DEPARTMENT OF BIOCHEMISTRY

APOLLO DIAGNOSTICS HEALTH PACK

Test Name	Result	Unit	Bio. Ref. Interval	Method
GLUCOSE, RANDOM , SODIUM FLUORIDE PLASMA (R)	98	mg/dL	70-140	Hexokinase

Test Name	Result	Unit	Bio. Ref. Interval	Method
ALANINE AMINOTRANSFERASE (ALT/SGPT) , SERUM	31.5	U/L	10-50	IFCC with Pyridoxal Phosphate

Comment:

ALT elevations are noted in liver parenchymal diseases, leading to injury / destruction of hepatocytes.

ALT levels are seen to be elevated even before the signs and symptoms of the liver injury appear.

The ALT levels remain high longer in blood as compared to AST levels. And though both the enzymes increase in liver injury, the rise in ALT is more compared to AST, thus also altering the ALT:AST ratio.

Test Name	Result	Unit	Bio. Ref. Interval	Method
ASPARTATE AMINOTRANSFERASE (AST/SGOT) , SERUM	21.5	U/L	10-50	IFCC with Pyridoxal Phosphate

Comment:

AST or SGOT is an enzyme which is predominantly present in the cytoplasm and mitochondria of a cell, mostly of liver, skeletal muscle, pancreas, kidney, heart.

Increased levels of AST can be seen in Acute liver injury , Myocardial Infarction, viral hepatitis and some poisonings like CCL4

For suspected liver injury, it is important to interpret AST results in association with ALT/SGPT results.

AST is also raised in event of burns, heart procedure , seizures, surgery, pregnancy, extreme exercise.

Test Name	Result	Unit	Bio. Ref. Interval	Method
TOTAL CHOLESTEROL , SERUM	178	mg/dL	< 200	CHOD-PAD

APOLLO DIAGNOSTICS HEALTH PACK

Test Name	Result	Unit	Bio. Ref. Interval	Method
TSH (Ultrasensitive/4thGen) , SERUM	12.900	μIU/mL	0.270-4.20	ECLIA

Comment:

TSH is a glycoprotein hormone secreted by the anterior pituitary. TSH is a labile hormone & is secreted in a pulsatile manner throughout the day and is subject to several non-thyroidal pituitary influences. Significant variations in TSH can occur with circadian rhythm, hormonal status, stress, sleep deprivation, caloric intake, medication & circulating antibodies.

It is important to confirm any TSH abnormality in a fresh specimen drawn after ~ 3 weeks before assigning a diagnosis, as the cause of an isolated TSH abnormality.

For pregnant females	Bio Ref Range for TSH in uIU/ml (As per American Thyroid Association)
First trimester	0.1 - 2.5
Second trimester	0.2 – 3.0
Third trimester	0.3 – 3.0
